

**220KV INSULATING TELESCOPIC STICK THREE SECTIONS FOR VOLTAGE  
DETECTORS AND SWITCHING DISCONNECTORS****TYPE P2-PB/500U-GSU/TEL**

High insulating telescopic stick made of polyester resin reinforced by fibreglass tube.

Max extended length 5 m, with locking device type Double Locking System, composed of:

- base element, external diameter 40 mm, yellow colour, with lower rubber closing cap and hand guard;
- intermediate element, external diameter 32mm, yellow colour;
- upper element, external diameter 24 mm, white colour, with plastic universal splined attack type **U**;
- metallic disconnecting hook with universal attack, to be fixed to universal attack of the stick.

Special characteristic: the telescopic locking device type double locking system allows to fix and to use the stick in different lengths up to 5m maximum.
